FLOOD BULLETIN NO. 6

PAMPANGA RIVER BASIN & ALLIED RIVERS

ISSUED AT 6:00 PM, 23 JULY 2025

(VALID UNTIL THE NEXT BULLETIN AT 6:00 AM TOMORROW)

Average Basin Rainfall as of time of issuance

Past 24-hr observed	Forecast 24-hr basin rainfall
---------------------	-------------------------------

14.6 millimeters	10-50 millimeters
-------------------------	--------------------------

BASIN'S LIKELY RESPONSE / RELATED IMPACTS & AREAS LIKELY TO BE AFFECTED

Rio Chico River at Zaragoza Station (N. Ecija)	Now at 4.66 m. above the 4.00 m. Alarm WL; very slow rise to continue and less likely to reach the 5.0 m. Critical WL status until tomorrow
-------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------

Pluvial floods (Ponding of rainwater along roadways and croplands) - La Paz, Zaragoza, San Antonio

Pampanga River at Arayat Station (Pampanga)	Now at 7.40 m. above the 6.00 m. Alarm WL; levelling-off steadily to continue but less likely to reach the 8.5 m. Critical WL status until tomorrow
----------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------

Pluvial floods (slightly submerged roads, croplands) in low-lying areas within - Cabiao, Arayat, San Simon, San Luis

Candaba Swamp Area at Candaba station (Pampanga)	Now at 5.65 m. above the 5.00 m. Critical WL; continue to very slow filling-up of swamp waters and levelling-off above the 5.00 m. Critical WL status until tomorrow
---------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Pluvial floods (partly submerged roads, croplands) in some areas within the swamp; San Miguel, San Ildefonso, San Rafael, Candaba; Combination of Pluvial and Fluvial floodings in San Luis, San Simon, Apalit

Pampanga River at Sulipan Station; Pampanga Delta areas (Pasac-Guagua Sub-Basin)	Now at 3.00 m. above the 2.60 m. Alert WL; fluctuating WL (tides & upstream flows); in fluctuating trend to continue until tomorrow. High tide in effect in the morning.
-----------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Coastal & riverside floods (**Fluvial**) due to high tides & from the relatively upstream river high flows towards the lower sections of Main Pampanga River that affect the riverside areas of: Apalit, Macabebe, Masantol, Calumpit, Paombong and Hagonoy; **Pluvial** floods (partly submerged roads, croplands) affect the Pasac-Guagua areas of: Minalin, Guagua, Sasmuan, Lubao, Sto. Tomas and other adjacent coastal towns

The public and the Local Disaster Risk Reduction and Management Councils (LDRRMOs) along the main Pampanga River are **advised to undertake preparedness & response activities** to mitigate the immediate and ongoing impacts of the prevailing **hazards associated with enhanced Southwest Monsoon; monitor heavy rainfall warnings, weather advisories, and other products issued by PAGASA.**
